

1. LEAD MANAGEMENT			
#	Feature	Include?	Comments
1.1	Add a new lead manually (name, phone, email, source)		A new lead must automatically be captured from lead form. Adding a new lead manually is applicable only for walk-in / referral leads.
1.2	Auto-generate unique Lead ID in X#### format	Yes	We have existing lead data and unique IDs for leads. New leads must follow the current series
1.3	Assign each lead to a Designer and a Business Lead	Yes	Leads must be assigned to each BL in round robin basis. BL will then assign it to designer. Note : While this is the current setup, in the near future we may have a CRE to qualify all the leads and then assign to designer directly. BL will be managing the designers and have control over his team's leads
1.4	Track multiple contact numbers per lead (primary + secondary)	Yes	
1.5	Record lead source (Meta, Google, Referral, Walk-in, Website, etc.)	Yes	This must be auto captured if it's a paid ad lead. Also the ad name must be auto captured so the marketing team can track to which ad performs better. Manual lead source entry must be only for manual lead entries.
1.6	Record project details: type, scope, location, possession timeline, estimated value	Yes	Everything that we are currently recording on our lead tracker must be recorded and the platforms must be kept flexible to add more fields in the future if required
1.7	Set lead intent level: High / Medium / Low	Yes	Along with the lead intent let's categorise each lead with a star rating from 1star to 5 star with 1 being least. Will add the categories to the lead tracker for reference
1.8	Add free-text notes on any lead	Yes	
1.9	Duplicate detection, system warns if same phone/email already exists	Yes	System must warn + tag it as duplicate lead : this must be applicable for all auto captured + manually entered leads
1.1	Bulk import leads from Excel / CSV file	Yes	
2. PIPELINE & STAGES			
#	Feature	Include?	Comments
2.1	Visual pipeline with 8 stages: Effective Lead → MQL → DQL → Proposal Ready → Proposal Presented → Onboarding → Inactive → On Hold	Yes	
2.2	Move a lead from one stage to the next with a single click	Yes	
2.3	Kanban board view (leads as cards grouped by stage)	Yes	
2.4	List / table view (all leads in a sortable, filterable table)	Yes	
2.5	Inactivate a lead with a mandatory reason (budget mismatch, selected another vendor, etc.)	Yes	Suggestion : Auto-generate an inactivation feedback form to the leads ' mail + sms : If any lead is inactivated on any stage after the effective lead stage then the mail+sms must trigger asking the lead to fill in this form. This might help us understand and have a track of why leads are lost and have a control over the internal team randomly inactivating leads.
2.6	Mark a lead as On Hold with expected revival date	Yes	A reminder must trigger on the actions to be done on that particular date
2.7	Filter leads by: designer, BL, source, stage, project type, location, date range, intent	Yes	

2.8	Search leads by name, phone number, email, or Lead ID	Yes	
3. CALL & CONTACT LOGGING			
#	Feature	Include?	Comments
3.1	Log a call on any lead: outcome (Answered / RNR 1–5 / Callback Scheduled), duration, notes	Yes	Is call recording possible + Is calling from the system possible? : As available in the teleCRM?
3.2	Track up to 5 RNR (Ring No Response) attempts per lead with timestamps	Yes	
3.3	After 5 RNR attempts, system prompts agent to escalate or inactivate	No	Sometimes a few leads might need time. Instead of directly inactivating it's better if system prompts agent to move it back to CRE and for CRE it can be flagged as a separate category so they'll keep trying all these leads. After 3 months of lead source and the lead is still RNR with CRE - system can prompt CRE and inactivate. System must prompt designer to escalate to BL and BL must only move it back to CRE after validation
3.4	Set a follow-up task after every call: choose date, time, and reminder type	Yes	This must be kept mandatory. Without a followup task and date agent must not be able to close the call
3.5	Agent receives a reminder notification when a follow-up is due	Yes	
3.6	Manager can see all overdue, upcoming, and completed follow-up tasks across the team	Yes	Manager must also be able to see pending tasks on that day across all leads that's mentioned on that day. For the system : the clock is 24hrs. If someone has mentioned today's date on a followup or task and hasn't completed it by today within midnight 12 system must flag it as "task incomplete" and notify the manager.
4. MEETINGS			
#	Feature	Include?	Comments
4.1	Schedule a DQL (Initial) meeting from within a lead record	Yes	System must trigger an email + sms to the lead upon scheduling with date and time
4.2	Schedule a PP (Proposal Presentation) meeting from within a lead record	Yes	System must trigger an email + sms to the lead upon scheduling with date and time . PP meeting can go twice or even thrice sometimes. It must be numbered accordingly.
4.3	Meeting modes: EC Visit (site visit) or Virtual	Yes	EC visit or Site Visit or Vitruual or Public place (sometimes team meets clients at a nearby coffee shop too)
4.4	Meeting statuses: Scheduled / Completed / Rescheduled / No-show	Yes	If marked as completed : The system must ask for MOM. It's mandatory. Without MOM agent must not be able to move forward ; If marked as rescheduled : Reason for rescheduling must also be entered (and it's mandatory) ; If marked as No-show : An email + sms to be auto triggered to client with asking for next available time to schedule Note : All the above actions must have auto triggered email + sms
4.5	Track whether meeting confirmation was sent to client (checkbox)		Auto-trigger
4.6	Track whether MOM (Minutes of Meeting) was sent to client (checkbox)		Auto-trigger
4.7	Log meeting outcome and notes when marking a meeting as Completed	Yes	Mandatory field

	4.8	Auto-calculate days between key milestones: Lead to DQL, DQL to PP, PP to Onboarding	Yes	
5. QUOTES & PROPOSALS				
#		Feature	Include?	Comments
	5.1	Open the existing Quote Builder (proposals.interiorsbydex.com) directly from within the lead record	Yes	
	5.2	Quote Builder pre-fills the Lead ID automatically, no manual entry	Yes	
	5.3	When a quote is created, it automatically appears in the lead's activity timeline	Yes	
	5.4	Lead's estimated project value updates automatically when a quote is generated	Yes	
	5.5	Direct link to view the quote stored on the lead record	Yes	
6. DISCOUNT APPROVAL WORKFLOW				
#		Feature	Include?	Comments
	6.1	Designer can raise a Discount Request on any lead: original amount, discount requested, reason	Yes	Designer will have authority of upto X % beyond which he might have to request. Can the quote generator software stop the designer from giving additional discounts beyond his authority and only upon BL approving the discount he should be able to apply?
	6.2	Business Lead receives an in-app notification for every pending discount request	Yes	
	6.3	BL can approve or reject the request with a written comment	Yes	Comment mandatory during rejection
	6.4	Approval / rejection is logged in the lead's activity timeline with BL name and timestamp	Yes	
	6.5	Designer is notified when their request is approved or rejected	Yes	
7. WHATSAPP MESSAGING				
#		Feature	Include?	Comments
	7.1	Send a WhatsApp message to a client directly from within the CRM	Yes	
	7.2	Pre-built message templates (pre-call intro, RNR follow-ups, meeting confirmation, MOM, onboarding)	Yes	
	7.3	Send free-text WhatsApp messages in addition to templates	Yes	
	7.4	All incoming client WhatsApp replies appear in the CRM against the correct lead	Yes	
	7.5	Full WhatsApp conversation history visible on every lead record	Yes	
	7.6	BL and Branch Head can see all WhatsApp conversations across all leads	Yes	

7.7	Global WhatsApp inbox, one view showing all incoming client replies across all leads	Yes	This global whatsapp inbox feature can only be applicable for the super admins (management) and admins(branch head). For users they will only be able to see their inbox and for managers they will be able to see their team's inbox.
8. EMAIL AUTOMATION			
#	Feature	Include?	Comments
8.1	Auto-send meeting confirmation email to client when meeting is scheduled	Yes	
8.2	Auto-send MOM email to client after Designer marks meeting as Completed	Yes	
8.3	Auto-send onboarding confirmation email when lead is moved to Onboarding stage	Yes	
8.4	Designer can preview email before it sends	Yes	A few stages like pre-onboarding, proposal ready emails must be reviewd, can be edited by designers. A few emails like meeting schedule can be sent directly as designer selects the date, time and reason.
9. SLA ALERTS			
#	Feature	Include?	Comments
9.1	Flag a lead if first contact not made within 24 hours of lead creation	Yes	
9.2	Flag a lead if not moved to MQL within 5 days	Yes	
9.3	Flag a lead if DQL meeting not scheduled within 3 days of reaching MQL	Yes	Within 5 days
9.4	Flag a lead if PP meeting not scheduled within 2 days of reaching Proposal Ready	Yes	
9.5	Visual "SLA Breached" badge on breached leads in all list and pipeline views	Yes	
9.6	BL and Branch Head receive an alert (in-app + email) the moment any lead breaches an SLA	Yes	
9.7	Dedicated "Breaches" panel on dashboard: shows all breached leads, which rule was broken, and how long overdue	Yes	
10. LEAD CAPTURE FROM ADS			
#	Feature	Include?	Comments
10.1	New leads from Meta (Facebook/Instagram) ads automatically appear in the CRM	Yes	
10.2	New leads from Google Ads automatically appear in the CRM	Yes	
10.3	UTM parameters (campaign name, ad set, source) are saved on every incoming lead	Yes	
10.4	Meta/Google leads are auto-assigned to CRE for initial qualification	Yes	
10.5	Google Form responses (DQL pre-meeting questionnaire) auto-attach to the correct lead record		Couldn't understand this?

11. ACTIVITY TIMELINE			
#	Feature	Include?	Comments
11.1	Every action on a lead is logged automatically: stage changes, calls, meetings, notes, WhatsApp, quotes, discounts	Yes	
11.2	Timeline shows who did what and when (name + timestamp)	Yes	
11.3	Timeline is visible to BL, Branch Head, and the assigned Designer	Yes	
12. TEAM ROLES & ACCESS			
#	Feature	Include?	Comments
12.1	Four roles: Designer, CRE, Business Lead, Branch Head	Yes	CRE receives leads from meta, qualifies and assigns to BL on round robin basis, BL assigns to designers, Branch head oversees
12.2	Designer sees and edits only their own assigned leads	Yes	
12.3	CRE can create leads, log calls, and qualify leads to MQL	Yes	Everyone's calls must be done through the system and all calls must be logged
12.4	Business Lead can see all leads, assign, approve discounts, and receive SLA alerts	Yes	All leads under his team of designers only
12.5	Branch Head has read-only access to everything, no editing or approvals	No	Branch head must have the option to give approvals incase BL is not available.
12.6	Admin can create new users, assign roles, and deactivate accounts		
13. DASHBOARD			
#	Feature	Include?	Comments
13.1	Live summary: total leads, leads today / this week / this month	Yes	
13.2	Visual sales funnel showing lead count at each stage	Yes	
13.3	Lead source breakdown (pie chart)	Yes	
13.4	Conversion rates: Lead → MQL → DQL → Proposal → Onboarding	Yes	
13.5	SLA breach panel: list of all currently breached leads	Yes	
13.6	Live team activity view: calls logged today, stages moved, tasks completed, per agent	Yes	Also live dashboard for each designer : No of active leads, No of PP done, No of onboarding done, Total target vs achieved target ; Likewise for BL
14. REPORTS			
#	Feature	Include?	Comments
14.1	Lead Summary, total leads by source and time period	Yes	
14.2	Pipeline Report, current stage distribution, days each lead has been in its stage	Yes	
14.3	Conversion Report, stage-by-stage conversion rates with percentages	Yes	
14.4	Timeline Performance, average days: Lead to DQL, DQL to PP, Lead to Onboarding	Yes	
14.5	Designer Performance, leads assigned, DQLs done, proposals presented, projects onboarded, conversion rate	Yes	Also track SLA for each designer

14.6	Business Lead Performance, leads managed, projects closed, average project value	Yes	Track discount metrics for each BL (based on the discount approval request)
14.7	Lead Source Performance, which source brings most leads and best conversion	Yes	
14.8	Campaign Performance, which specific Meta/Google campaign is generating the best leads (requires UTM)	Yes	
14.9	Inactive Leads, who dropped off, at which stage, and why	Yes	Lead inactivation feedback form must be tracked too : Why most of the clients denied us even after having a requirement?
14.1	Meeting Performance, meetings scheduled vs completed, no-show rate	Yes	Must be tracked for each designer
14.11	Sales Cycle Report, average and fastest/slowest days from lead to onboarding	Yes	
14.12	Lead Aging, leads stuck in a stage longer than the SLA threshold	Yes	
14.13	Monthly Trend, line chart of leads created per month	Yes	Also quarterly / half-yearly / annual trend required : which month had best leads? which month had best conversions? which had the worst?
14.14	All reports filterable by: date range, designer, BL, source, stage, project type, location	Yes	
14.15	Export any report to Excel or CSV	Yes	
14.16	Schedule automatic weekly/monthly report emails to selected team members	Yes	Both weekly and monthly reports. Weekly report will have diff format and monthly report in diff format. Ref format in lead tracker sheet
			Additional feature + report : Offer given for every lead must be tracked. (each offer will have a name like EID offer, Women's day offer etc.) ; A report that shows the number of onboardings based on each offer. This will help the marketing team analyse which is working better and which is not.
