

Category 1, Already Built (Backend + Logic Complete)

These exist and work in the API. We just need a UI layer on top.

Feature	Status
Lead list with stage, status, source, intent, designer, value columns	✓ API done
Lead detail: key facts, assignment panel, activity timeline	✓ API done
Intent rating (1–5 stars) on lead	✓ intentRating field
Log a call (manual)	✓ Calls routes done
Schedule meeting, complete, reschedule, no-show	✓ Meetings routes done
WhatsApp message per lead	✓ Twilio + routes done
Discount request → BL → Branch Head approval chain	✓ Full workflow done
Approval authority tiers (≤10% Designer, 10–15% BL, >15% BH)	✓ Logic enforced
Reject must log reason	✓ Built
SLA breach detection and tracking	✓ SLA job done
Role-based access (BH, BL, Designer, CRE)	✓ Done
DIP checklist (5 booleans, auto-sets completedAt)	✓ Done

ON_HOLD: email + SMS + WhatsApp sent to client	✓ G1 done
Performance tiers (BASIC/STANDARD/PREMIUM), conversionRate	✓ G4 done
Lead filters: stage, status, source, location, intent, projectType, dateRange	✓ G2 done
BL auto-assigned on MQL (round-robin)	✓ G5 done
SLA rules configurable (admin)	✓ SLARule model + CRUD
WhatsApp templates (pre-approved)	✓ Template system done
Notifications to users on events	✓ Done
Admin job triggers (SLA check, midnight, performance recalc)	✓ Done

Category 2, Backend Exists, UI Not Built

These are features that were in-scope and are fully functional on the backend, but the client-side screens shown in the mockup don't exist yet in our frontend artifact.

Feature	What's missing
Kanban pipeline board, cards with name, value, location, intent, source, assignee, SLA badge	UI only, all data exists
Lead list table, filterable, searchable, Export CSV	UI only (API has it all)

Lead detail page with tabs (Overview, Activity, Calls, Meetings, WhatsApp, Quotes, Discounts)	UI only
WhatsApp inbox, conversation list + chat view per lead	UI only
Meetings list, split by meeting type, sorted by date	UI only
Discounts dashboard, pending/approved/rejected counts, authority bar, review modal	UI only
Admin dashboard, KPI cards (pipeline value, active leads, NPS, SLA breaches)	UI only
Reports page, lead source chart, stage distribution chart, conversion %	UI only (data computable from DB)

Category 3, New Features (Not in Original Scope)

These are features that were not discussed or specified in the feature list. These need to be scoped as new work.

1. Intent Auto-Scoring Algorithm

The client wants the system to automatically assign a star rating based on inputs the CRE fills in before moving to MQL. The CRE provides answers (budget, timeline, readiness, etc.) and the system calculates a score. If the CRE overrides it, they must log a reason, and that override is permanently audited.^{C1}

Currently we have: a manual intentRating field the CRE sets freely. No algorithm, no auto-score, no override audit log.

2. Stage-Gate Mandatory Fields^{C2}

Before moving a lead from one stage to the next, the system must enforce mandatory checklist items, e.g., you cannot move to MQL unless a meeting is scheduled and a budget is entered. You cannot move to Proposal Ready unless a floor plan is uploaded.

Currently: stage changes are free. There is no gate enforcement.

3. VOIP / Real Phone Call Integration^{C3}

The client explicitly said: "the call should automatically go from the system through my phone."

The recording should be available in the system." They want CRM-initiated calls with automatic logging and voice recording.

Currently: we have manual call log entry only. No actual phone call integration.

● 4. MOM Auto-Send on Meeting Completion ^{C4}

When a meeting is marked Complete, the system must force the user to type:

- Minutes of Meeting (MOM), sent automatically to client via email + WhatsApp
- Internal outcome, stored internally only

Currently: meeting notes/MOM are optional and not auto-sent to client.

● 5. No-Show → Client Notification ^{C5}

When a meeting is marked No-Show, in addition to logging a reason, the system should also notify the client via WhatsApp/email.

Currently: no client notification on no-show.

● 6. Personal Calendar per User ^{C6}

Every user login should have a personal calendar view that shows their scheduled meetings, auto-populating from what they've created in the CRM.

Currently: no calendar feature at all.

● 7. Offers / Schemes with On/Off Toggle ^{C7}

In Settings, admin should be able to create named offers (Pongal Special, Women's Day Offer, Diwali Dhamaka, etc.) and toggle each one on/off. When a designer applies an offer to a lead, only active offers should be selectable.

Currently: we have an offerTag string field on leads but no offers management table, no toggle, no enforcement.

● 8. Proposals by DeX (P-Platform) Deep Integration ^{C8}

When a designer enters a Project ID (P-number) on a lead, the system should auto-fetch all quotes created for that project from the P-Platform and display them. Currently the full P-Platform is embedded as an iframe. The client wants the CRM to pull and display quote data directly.

Currently: full platform embed only, no API-level quote fetching.

● 9. UTM / Campaign Attribution on Leads ^{C9}

The lead detail mockup shows: Ad/campaign, UTM campaign, UTM adset, UTM source, UTM medium fields. These should auto-populate from digital lead forms.

Currently: we have source and adSource fields but no UTM-level granularity in the schema.

● 10. Follow-up Scheduling on Leads ^{C10}

The lead detail panel shows a "Follow-up" section with a date/time and action. A separate reminder/task tied to the lead.

Currently: we have a Tasks system (per-lead tasks), but no specific "follow-up" slot on the lead card itself.

Items the Client Explicitly Deferred (Do Not Build Now)

They said clearly in the transcript to skip these for Phase 1:

- Procurement
- Finance (invoices, collections, payments)
- Service & Warranty
- Technical, Production, Site Execution phases of Project management

The mockup shows these screens only for completeness, the client said "we'll leave this as of now." Don't be misled by the Finance and Projects screenshots.

Summary Table

Category	Count
✅ Backend + logic complete	~20 features
🟡 Backend done, UI not built yet	~8 screens
🔴 Genuinely new (not in scope)	10 new features
⏸ Explicitly deferred by client	Finance, Procurement, Service, Production phases

C1 ”  1. Intent Auto-Scoring AlgorithmThe client wants the sy... ” in Page 3

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:06 am

The star rating for leads was already requested on the original scope (PI ref Interiors by DeX | CRM features doc - Feature 1.7) ; The auto-score or override logic is not required as of now.

C2 ”  2. Stage-Gate Mandatory Fields ” in Page 3

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:06 am

The stage-gate mandatory fields was already requested (PI ref Interiors by DeX | CRM features doc - Feature 2.2) The logic was explained for DIP however same logic applies for each and every stage and must have mandatory fields

C3 ”  3. VOIP / Real Phone Call Integration ” in Page 3

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:12 am

The call integration was already requested on the original scope. (PI ref Interiors by DeX | CRM features doc - Feature 3.1)

C4 ”  4. MOM Auto-Send on Meeting Completion ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:12 am

The MOM auto-send was already requested on the original scope. (PI ref Interiors by DeX | CRM features doc - Feature 4.4)

C5 ”  5. No-Show → Client Notification ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:14 am

The No-show client notification was already requested on the original scope. (PI ref Interiors by DeX | CRM features doc - Feature 4.4)

C6 ”  **6. Personal Calendar per User** ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:14 am

New feature - Required

C7 ”  **7. Offers / Schemes with On/Off Toggle** ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:15 am

New feature - Not required as of now

C8 ”  **8. Proposals by DeX (P-Platform) Deep Integration** ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:15 am

The Proposals by DeX deep integration was already requested feature (PI ref CRM tech queries doc - Query 1 and my response)

C9 ”  **9. UTM / Campaign Attribution on Leads** ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:16 am

The UTM level detail is already requested (PI ref Interiors by DeX | CRM features doc - Feature 1.5,10.3,14.8)

C10 ”  **10. Follow-up Scheduling on Leads** ” in Page 4

Vaishali Sampath on Tuesday, 16 Jun 2026, 10:17 am

The follow-up scheduling is already requested (PI ref Interiors by DeX | CRM features doc - Feature 3.4, 3.5, 3.6)
